

Manager/Supervisor | Training & Development Offerings

Financial Tools and Concepts (1 Day)

Every organization measures financial performance by key financial indicators including revenue, profit or net earnings, return on equity and return on investment. Cooperatives also have other financial indicators that are important like patronage, revolving equity and return on invested capital. Managers need to understand what these measures are and how what they and their work groups do affects these measures.

INTENDED AUDIENCE

Supervisors and managers who want to understand key financial indicators and how to positively impact those indicators.

DURATION

1 day

WHAT PARTICIPANTS WILL LEARN

Financial Tools and Concepts is an interactive session that helps managers and supervisors:

- Understand basic finance and accounting principles
- Interpret financial statements
- Read a balance sheet
- Interpret and understand an annual report
- Interpret key financial indicators used to measure and control the cooperative's performance
